HAIX® OneTouch

HAIX® Climate System

HAIX® High Durability Cap System

HAIX® Vario Wide Fit System

RFID Pocket

Boot jack

Uppers

Waterproof leather, hydrophobised, breathable, 2.0 – 2.2 mm thick

Inner lining

CROSSTECH® Laminate Technology, waterproof and breathable. Abrasion-proof lining fabric for optimum climate comfort at all times of the year, especially when frequently moving between indoors and outdoors. Excellent penetration protection against blood and other bodily fluids (thus preventing ingress of viruses and bacteria).

Inlay

Comfortable with cushioning and moisture-wicking effect. Separate heel cup ensures optimised cushioning and foot guidance. "AIRFLOW" channels. "Perfect Fit" marking for optimised boot size choice.

HAIX® composite protective cap

Anatomically shaped, ultra-light protective cap made of fibre-reinforced plastic to meet the very highest safety requirements.

Insole

Moisture-wicking non-woven fabric insole.

HAIX® High Durability Cap System

Rubber cap with special profile to ensure longer service life.

HAIX® protective sole

Flexible, lightweight metal sole insert to prevent punctures.

Sole

Lightweight rubber/PU sole in a sports style with a sturdy road/rough terrain profile, and enhanced toe-to-heel support; wear-resistant with excellent anti-slip properties – even in cold weather. A lightweight PU shock absorption wedge provides outstanding walking comfort and excellent thermal insulation. The flame-resistant outer sole is non-marking according to EN 15090:2012 and offers excellent resistance against heat and fuels. Its bright yellow signal marks are visible even through thick smoke.

HAIX® Arch Support System

Optimum ankle support and shock absorption in the arch area is provided by an anatomically formed last. Good foot guidance and a secure hold thanks to a narrow heel and ankle shaft combined with added comfort offered by a broad front foot area.

HAIX® Identification System

Name field for boot labelling.

HAIX® Vario Wide Fit System

Three different boot inserts enable you to adjust the boot to the width of your feet.

HAIX® Climate System

Micro-dry lining around the upper end of the shaft uses the natural pumping motion generated as you walk along to transport moisture to ventilation slits at the shaft and tongue.

HAIX® OneTouch

Combines speed, innovation, and over 70 years of experience. With just a click or a tap, the shoe closes in 0.7 seconds and fits perfectly around the calf and shin.

Sun Reflect

Reduces the heating effect produced on the upper leather by the sun's rays. Sunlight is reflected by the leather, thus ensuring that less warmth is directed to the foot.

Further features

Ankle protector, extra-flexible shaft, pull tabs, boot jack, ESD, reflective strips on the shoe and sole
